Profile

DEBO HPL Lockers are made of 100% original DEBO High Pressure Compact Laminate (Solid Phenolic Panel) that is solid, attractive, safe and extremely durable. They are featured and outstanding lockers to secure your leisure life.

Due to the high quality of the panels which are excellent in resisting to water, corrosive substances, impact and mechanical stresses, DEBO lockers are suitable and often required for areas of fitness clubs, sauna rooms, SPA houses, swimming pools, Aqua Centers and sport centers. However, they are also widely used in schools, hospitals, shopping malls and hotels.

DEBO provides a total service of design with extensive range of style and specification.

Project References

Medical Complex, Saudi Arabia.

One of the most remarkable projects that DEBO has supplied is a Medical Complex where hospitals, universities, research institutes are integrated in a huge park. DEBO completed more than 20,000 doors for staff changing rooms.

Prime Minister's Office, Brunei

The most powerful lockers project that DEBO has supplied is the PMO building in Brunei Darussalam. It is a complete new office building for the executives and management of the country Brunei. DEBO finished about 1,000 doors for executives? changing rooms and monitored installation on site.
