JOIN THE FITNESS REVOLUTION

The Gym Flooring Specialist

PaviFLEX is the main spanish gym flooring producer. More than 35 years producing rubber and EVA sheets provides us the right knowledge to offer the best flooring solution for each sport activity.

The best floor for each activity, so comfortable that anyone could train barefoot on it. Produced in Spain with a high density powerful non-marking virgin rubber, PaviFLEX flooring is so elastic that will return the energy of the impact and will reduce the risk of injuries when training. It is made for intensive use so it is resistant and durable as no other in the market, it absorbs the impacts acting as an excellent acoustic isolation material, with the optimum friction coefficient for each sport activity. It is water proof, very easy to clean and maintain, and the installation is really easy, just puzzle interlock the tiles on a clean and plain surface, you do not need to glue. PaviFLEX is fully customizable in colors, finishings and markings with insertions so they will never go away.

AEROBICPRO

PaviFLEX Aerobic PRO has been specially developed for all type of supervised activities. It is an exceptional flooring for aerobic areas where you also need to use equipment.

AEROBIC PRO is made with the optimal density to increase the balance, absorb the impact and reduce the athlete's fatigue helping to the energy restoration, getting the regularity of rebounds and reducing the risk of injuries when training.

This is a floor with an optimum friction coefficient for exercises where the athlete movement is the most important.

It is water proof and it does not absorb water or sweat, so it is a really easy to clean and maintain floor.

Aerobic PRO is available in a wide range of colors, including the wood effect and the marble effect. The installation does not require glue, just puzzle interlock the tiles on the existing clean and plain surface.

Aerobic PRO can be customized with any logo, marking or design, so everyone can create their own corporate space.

FITNESS
EQUIPMENT & INDOOR CYCLING

COA

Flooring developed for standard fitness zones with several colours and finishes.

FITNESS

PaviFLEX Fitness is exceptional flooring for standard fitness areas with cardio and indoor cycling.

Made with 100% virgin rubber of the highest quality, it is a long lasting floor, resistant and flexible at the same time. Thanks to PaviFLEX newest vulcanization process, Fitness is produced with the right properties to support the cardio equipment, decrease the vibrations and reduce the noise of dumbbells.

PaviFLEX Fitness do not absorb water, nor sweat, it is water proof anti-bacterial, so it does not smell and it is really easy to clean. It is available in a wide range of colors, including the wood and the marble effect colors. Its installation is so easy as puzzle interlock the tiles.

PaviFLEX Fitness can be customized as per customer request with any logo, marking or design, so each fitness center is different and will stand out from the others.

PaviFLEX FITNESS is the best solution...

- Resistant and versatile
- Acoustic Isolation
- Reduce vibrations
- Elegant design
- Water proof
- Easy to clean
- Non marking floor
- Customization

NEXA
FIT

FUNCTIONAL FITNESS ROOM

PaviFLEX FITNESS^{eco} blackstone with inserted markings in White and Blue.

*The most Eco Friendly
and price wise flooring*

FITNESS^{eco} is 100% compatible with PaviFLEX Fitness, so you can highlight the rooms with functional training markings in any color, easy optimization of the budget.

PaviFLEX FITNESS^{eco} is the exceptional flooring at the right price.

Not only this is a price wise product, but also this is PaviFLEX respectful contribution with the environment. Fitness Eco is produced using the scraps of our Fitness flooring production, we recycle and produce again, so we obtain an Eco product with the same properties as our Premium product, but less expensive.

The Fitness^{eco} surface is water proof, as it is made of compact virgin rubber that do not allow the water or the sweat to penetrate, therefore the product do not smell and it will keep the same appearance much longer than others. Fitness Eco is really easy to clean and maintain using just water and non abrasive soap for daily cleaning.

Fitness^{eco} is produced in different spotted colors: Blackstone, Grey, Terra, Viola and Granite, but it can also be produced as per customer request, for instance with Red dots or Yellow dots.

PaviFLEX has developed a new flooring for all type of strength areas with heavy cardio and intensive use equipment, where it is needed to reduce noises, vibrations and absorb the impacts of dumbbells and weights.

Specially designed for intensive use workout areas and rooms with a heavy transit of users and heavy equipment. Produced with a powerful virgin rubber of the highest density, it is a non marking floor, resistant and long lasting as no other. Absorbs the impacts acting as a perfect acoustic isolation material with the optimum friction coefficient for the best grip performance.

Fitness PRO has an extraordinary grip, it is flexible, comfortable and fire resistant.

The interlocking system makes the installation as easy as just place the tiles on existing solid, clean and plain surface and puzzle interlock the tiles without any glue.

Fitness PRO can be customized with any logo, design or marking. The markings are inserted with rubber of different color, so they will never disappear when using the floor.

Room with more than 500m² surface, with a central island of Fitness PRO orange for heavy equipment and external perimeter in Marble gray.

Cardio room fully equipped with Fitness PRO in Marble Grey and Light Blue, creating two atmospheres very well integrated. This is a high resistant surface that reduces the vibration of the equipment and acts as an acoustic isolation for the building. It is water proof so it do not absorbs water or sweat.

CARDIO
INTENSIVE USE

TRAINING ROOM WITH CARDIO EQUIPMENT IN INDIA

FREE
WEIGHTS

FITNESSPRO^{ECO}

Fitness PRO^{ECO} is a price wise compact product with exceptional properties.

PaviFLEX Fitness PRO^{ECO} is the less expensive and the best sustainable solution for the gym. It is produced with recycled material of our Premium products, becoming a greatest choice when looking for a free weights and heavy equipment resistant flooring.

The highest density of the compact virgin eco rubber makes our Fitness Pro^{ECO} to absorb impacts, support the heaviest equipments and reduce vibration and noises.

It is water proof, it does not absorb water or sweat, so it is really easy to clean and maintain with water and non abrasive soap.

ECOFriendly

A sustainable product fully customizable that works perfect together with Fitness PRO for highlighting areas with logos, designs and markings.

STRENGTH
HIGH INTENSITY

Resistance & Elegance

PaviFLEX Fitness Xtreme is, probably, the best gym flooring in the market. Exclusively developed to provide the highest performance in strength zones, free weights areas and CrossTraining rooms, this floor fits perfectly with the intensive use.

The surface design combined with the composition of the rubber provides the non slip properties needed for strength workouts. The optimum friction coefficient to obtain the best traction and the highest density to get the exceptional impact absorption.

A floor really easy to install. Water proof and anti bacterial, it is really easy to maintain.

Available in a wide range of colors, including wood and marble effects, any color can also be produced per customer request.

Fully customizable with any logo, design or marking, so customers can create their own atmosphere to stand out from the rest.

FUNCTIONAL
TRAINING

ENJOY while training

Choose one of our training circuits or just create your own functional training circuit. There is no limit for customization and design on functional markings on the floor.

The markings of ZONNAX functional training circuits are made with insertions of same rubber in different colors, so the markings will never disappear.

Design yourself the functional area you wish and provide your users with original training programs and a modern nice visual of floors and walls.

In our catalogue we offer you the most useful functional training markings where you can workout many different programs of speed, reaction, coordination, agility, balance, rhythm or strength, and we invite you to send to us your own idea to help you making it real.

**We show you how to use Zonnax
with Functional Training programs
developed by We FitAcademy.**

FUNCTIONAL MARKING

We can customize your own Functional Training zone.

EVO LADDER

For exercises where agility plays a big role and also for measure progression. Ladders are a great training tool for sports where agility plays a big role. Ladders are perfect to practice fast feet exercises are used on a regular basis. Markings on the floor save space when it comes to setting up and taking down this type of equipment. They can also be a great indicator for positioning of similar pieces of kit like mini hurdles making sure they are all spaced evenly. Ladder markings can be also made on the floor to allow trainers to measure progression in areas like flexibility and explosivity.

HOOPS

For positioning and more. Hoops, dots or spots, are a type of marking that seems really simple and straightforward, but it's not until you really think about it that you realise that to utilise them properly takes a bit of imagination. The simplest way of incorporating them into training is using core strength exercises. To do this, you can essentially treat the hoops, hands and feet can be forced into various positions while engaging the core to hold a secure position whether this is using set movement combinations or variations on plank, press-up or stretching positions. Another idea would be to use hoops for 'fast-feet' exercises or agility and speed movements that are commonplace in many sport specific warm-ups and conditioning circuits.

METRE

Measure the distance between user and equipment, for instance TRX. The key function of simple metre lines markings would normally be to measure the distance between the user and some piece of equipment in order to make sure you're working in the best position. For examples an area where there is a suspension system TRX, cable machine or resistance band workout taking place. The lines can be used to measure the progression or breaking down of suspension training exercises. Metre will also be useful for measure the distance when jumping.

SPRINT TRACK

For guiding and designate a floor space for specific exercises. The sprint track is something that, despite the name, is probably not frequently for sprinting in a gym environment. More common uses of a sprint track, within a functional gym, would be for walking exercises like lunges or farmer's walks to mark out the route for safety. Depending on the flooring type, a sprint track might also be used for sled work or tyre flips, again to mark out a safe route and distance for the user.

COMPASS

For exercises where there are lots of twisting and rotational movements as a reference point. The function of a compass marking would generally be similar to the Square for exercises where there are lots of twisting and rotational movements. It can offer more detailed guides to the user about the angles and positions their body should be in. ViPR loaded movement training is a type of exercise that utilises these rotational, lateral and medial movements which, can be assisted in the early stages with a compass as a reference point on the floor. Compass stations these can be ideal for marking out foot and hand positions and the progressions users can make by changing these.

ACOUSTIC
ISOLATION

the guardian of SILENCE

Perfect flooring for acoustic isolation. Developed for all intensive use activity with heavy equipment and freeweights, including Cross Training. It has been developed for acoustic isolation thanks to the type of raw material used in its vulcanization. MAT 030 reduces more than 27 dB as per Norm ISO 10140, this is the guardian of silence for your gym. MAT 030 is also an excellent shock absorbing floor for impacts.

PORTABLE BOARD POWERFLEX

Specifically developed as the acoustic isolation solution for urban gyms, this flooring is nowadays one of the most important products for PaviFLEX.

MAT 030 is available in solid colors and can be produced with rough surface or plain surface. It is produced in large tiles puzzle interlocking for an easy installation that do not need to be glued. It is fully customizable with any logo, design or marking.

MAT030 is...

- Perfect for acoustic isolation
- Vibration reduction
- High resistant
- Long Lasting
- Water proof
- Optimum Friction Coefficient
- Easy cleaning
- Easy installation

BARE TRENING URBAN GYM, NORWAY

Installation with MATO 30 Grey for strength zone in an urban gym.

ACOUSTIC ISOLATION SUBSOIL

CONFORTSONIC is the specific solution from PaviFlex to reduce the structural vibrations and acoustic transmissions caused by the free fall of weight on the ground.

The Confortsonic tiles have been developed to be installed under the floor, substantially increasing the acoustic protection and soundproofing of the room. It is a valid product for floor and wall, and its presentation in tiles four sides puzzle means that it does not need to be glued.

The precision of the cutting of the interlocking puzzle, prevents the sound from proliferating between the joints and bouncing the vibrations towards the surface, contributing to an extra noise reduction of 27 dB (according to ISO 10140), in addition to the absorption produced by the floor installed on its surface.
